Objective

Am a professional skilled software developer still aspiring to learn more, I have a vast knowledge in front end web technologies (HTML, CSS,JavaScript,Bootstrap and jQuery), and also familiar with backend technology tools (Python, Django frame works).
I have also led a team in a coding competition and also organise and coordinated a group of developers across the nation to build projects hence adding to my leadership skills.
I plan on making the very best problem solving software technologies and make the tech sector more advance on a global scale.

Experience
